- Help and Information

- Browser Compatibility
 - Cross-platform
 - Silverlight
 - Preferred browser

- Browser Compatibility
 - Cross-platform
 - SharePoint 2010 now works the same in all web browsers
 - Internet Explorer
 - Mozilla Firefox
 - Google Chrome
 - Apple Safari
 - Silverlight
 - Preferred browser

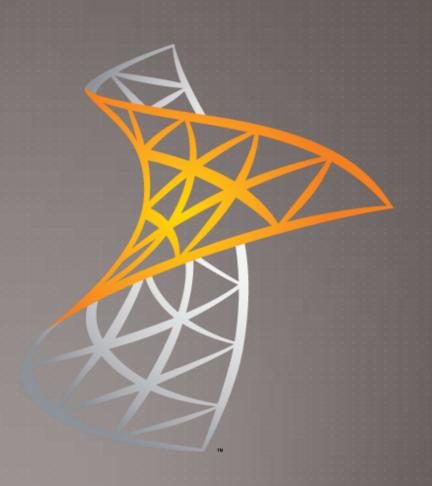

- Browser Compatibility
 - Cross-platform
 - Silverlight
 - SharePoint 2010 uses the Silverlight plug-in (similar to Adobe Flash) to create dialog boxes and windows for data entry and functionality.
 - Preferred browser

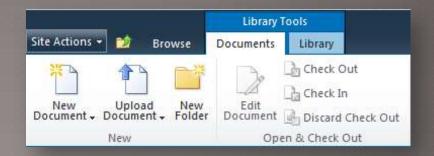

- Browser Compatibility
 - Cross-platform
 - Silverlight
 - Preferred browser
 - Although SharePoint 2010 now supports multiple browsers, Internet Explorer is still the best choice when working with a SharePoint site.

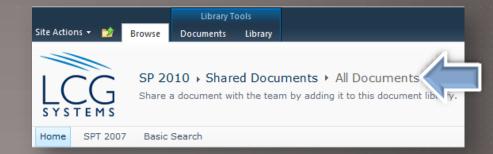

- ► Interface and Navigation
 - ► The Ribbon UI
 - Bread crumb trail and views
 - Folder navigation icon
 - Site actions
 - All site content

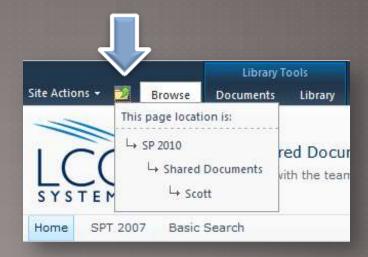

- ► Interface and Navigation
 - The Ribbon UI
 - Introduced in Office 2007, SharePoint 2010 uses the Ribbon User Interface for all navigation and functionality.
 - Bread crumb trail and views
 - Folder navigation icon

 - The New button
 - Selection checkboxes
 - Inline editing
 - Column defaults
 - Column validation
 - Metadata navigation
 - Allows a user to navigate and filter items and files by using pre-defined value. In libraries, includes all files in all folders within the library.

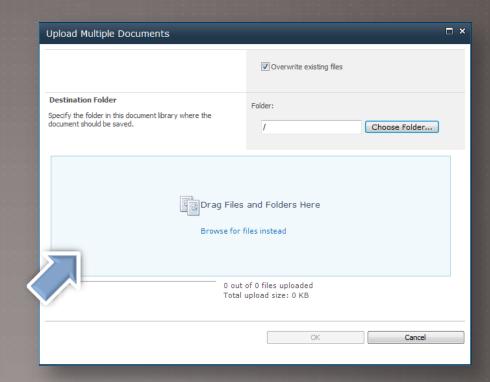

- Uploading Files
 - Direct to folder
 - Using drag and drop
 - Drop-off libraries

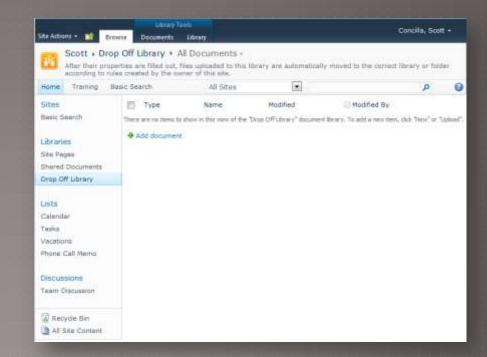

- Uploading Files
 - Direct to folder
 - When uploading a file to a library you can choose the folder where the file should be uploaded to.
 - Using drag and drop
 - Drop-off libraries

- Uploading Files
 - Direct to folder
 - Using drag and drop
 - When using SharePoint 2010 with Windows 7 and/or Office 2010, files can be uploaded to a SharePoint library by dragging them from Windows Explorer into Internet Explorer.
 - Drop-off libraries

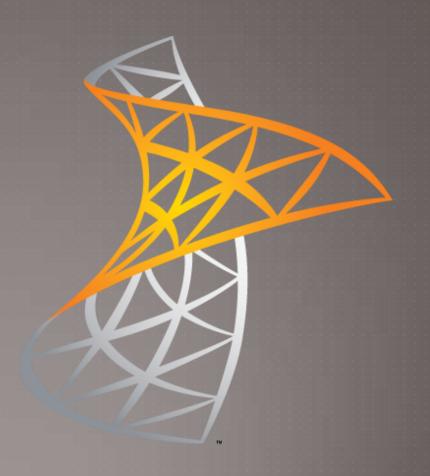

- Uploading Files
 - Direct to folder
 - Using drag and drop
 - Drop-off libraries
 - Automatically moves files to the correct library and folder according to rules set up by an owner or administrator.

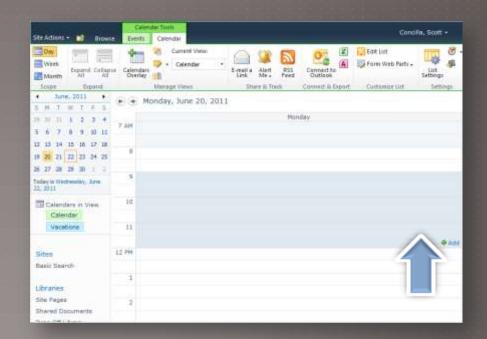

Calendars

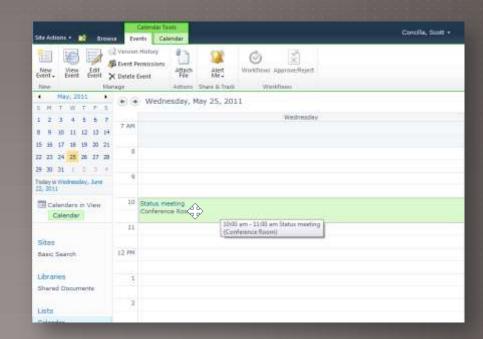

- Adding appointments and events
- Using drag and drop
- Calendar overlay

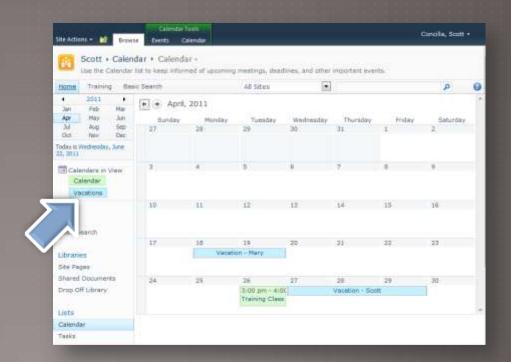

- Calendars
 - Adding appointments and events
 - Users can highlight multiple time blocks in the calendar to create an appointment or event.
 - Using drag and drop
 - Calendar overlay

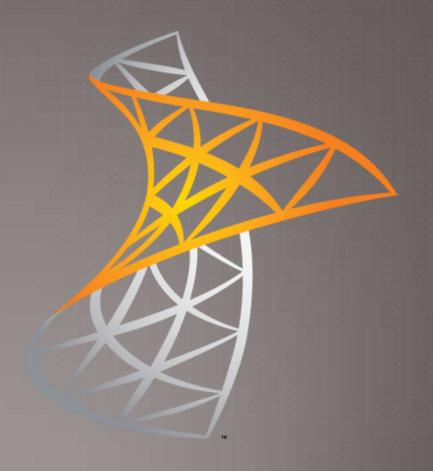

- Calendars
 - Adding appointments and events
 - Using drag and drop
 - Dates and times of appointments can be changed by dragging the item to the new time, just like Outlook.
 - Calendar overlay

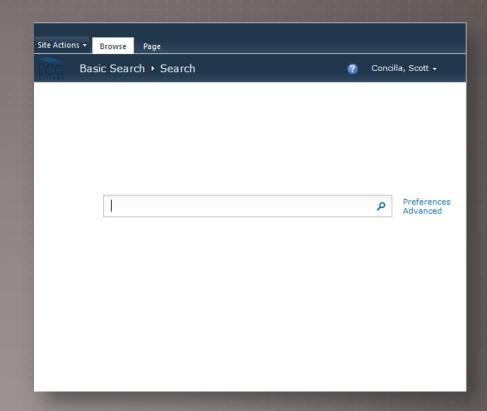

- Calendars
 - Adding appointments and events
 - Using drag and drop
 - Calendar overlay
 - Views can be created that include multiple, separate SharePoint calendars, creating a "roll-up calendar".

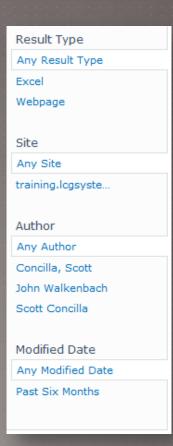

- Search
 - Using the search center
 - Using search refinements

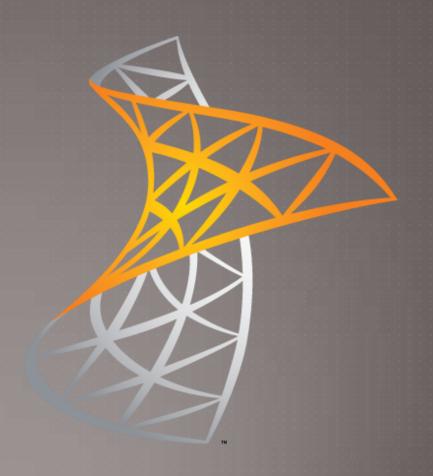

- Search
 - Using the search center
 - sharePoint 2010 has a new search interface that allows users to set up search preferences and advanced options. SharePoint 2010 also supports a variety of search centers, including Enterprise Search and People Search.
 - Using search refinements

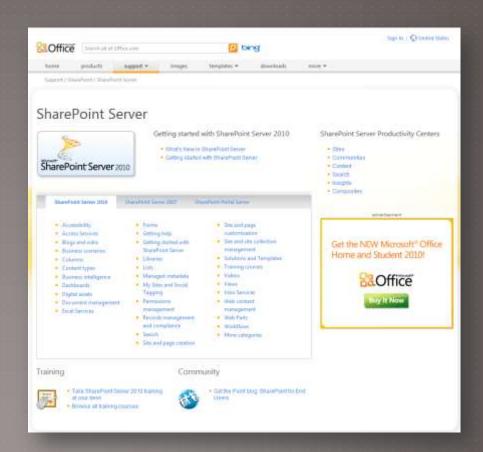

- Search
 - Using the search center
 - Using search refinements
 - When searching for files or items, SharePoint displays search refinements next to your results. These allow you to filter and refine your search results to help you locate what you're looking for.
